

In this chapter, we will learn how to read and interpret data using pictographs and block graphs, and even make some predictions about what might happen.

Pictographs

A pictograph is a special kind of graph that uses pictures to show information.

Example 1:

Following pictograph represents favourite sports of the students. Read and interpret the data from that pictograph.

Favourite Sport	Students
	
	 
	  

In this pictograph, each icon of students represents 1 favourite sport. So, if we see 2 icons for football it means 2 students like Football. Similarly, 3 students like cricket and 1 student likes tennis.

Example 2:

Following pictograph represents animals. If each pet icon represents 2 animals then read and interpret the data from that pictograph.

Names	Number of pets
Fish	 
Cat	   
Dog	    

Unit 9: Statistics and Probability

In this pictograph, each pet icon represents 2 animals. So, if we see 5 dog icons, it means $5 \times 2 = 10$ dogs are there. The same feedback can be interpreted for the Cat and Fish too.

Activity

Following pictograph represents vehicles for transportation. Read and interpret the data from that pictograph.

Names	Number of Vehicles
Bus	  
Bicycle	   
Car	     
Each icon represents 4 vehicles	

In this pictograph, each transportation icon represents 4 vehicles. So, if we see 6 car icons, it means $6 \times 4 = 24$ cars! The same can be interpreted for the Bicycles and Buses too.

Block Graphs:

A block graph is a graph that uses blocks or bars to represent data. Each block or bar represents a certain number of items.

Example 1:

Following block graph represents sleeping hours of Nasir for three different days. Read and interpret the data from that block graph.

In this block graph, each block represents 1 hour. So, if we see 9 blocks for Sunday, it means 9 hours of sleep on Sunday! The same can be interpreted for Monday and Tuesday.

Example 2:

Following block graph represents favorite colors of the students. Read and interpret the data from that block graph.

In this block graph, each block represents 2 students. So, if we see 5 blocks for red, it means $2 \times 5 = 10$ students like red color. Similarly, 3 blocks for blue, it means $3 \times 2 = 6$ students like blue color and 4 blocks for Green color, it means $4 \times 2 = 8$ students like green color.

**Example 3:**

Following block graph represents favorite fruit of the students. Read and interpret the data from that block graph.

In this block graph, each block represents 3 students. So, if we see 8 blocks for Orange, it means $8 \times 3 = 24$ students like Orange. The same can be interpreted for the apple and Banana.

Possibility of Occurring of any event

Have you ever wondered how likely it is to get a sunny day or a rainy day? Or how likely it is to get a certain color of candy from a bag? We can use special words to describe how likely something is to happen. These words are: impossible, less likely, more likely, unlikely, and certain.

Impossible

Something that is impossible will never happen.

Example:

It is impossible for a horse to fly.

It is impossible for a cat to bark.

Less Likely

Something that is less likely is not very likely to happen.

Example:

It is less likely for a boy to run who has fracture in his foot.

It is less likely for a rainbow to appear in the sky on a cloudy day.

More Likely

Something that is more likely means it has more chances to happen.

Example:

It is more likely that Ali's grandmother would feel ill in cold weather.

It is more likely for a ball to bounce when dropped.

Unlikely

Something that is unlikely means it has no chance to happen.

Example:

It is unlikely for a car to fly.

It is unlikely for a flower to grow in a desert.

Certain

Something that is certain will always happen.

Example:

It is certain for a ball to fall when dropped.

It is certain that a night comes after the day.

Exercise 1

1. The following is pictograph of the traffic passing through a signal.
One picture = 2 vehicles

Now look at the graph and answer the following questions:

- (a) Which vehicles are more in numbers?
- (b) Which vehicles are least in numbers?
- (c) How many busses passed through the signals?
- (d) How many motor bikes passed through the signals?
- (e) How many vans and bicycle passed altogether?

2. The following pictograph shows the number of animals in the zoo.
Here each picture represents 2 animals.

Now look at the pictograph and answer the following questions:

- (a) How many lions are there?
 - (b) How many animals are there altogether?
 - (c) How many more foxes are there than elephants?
 - (d) How many different types of animals are there?
 - (e) Which animals are most in number?
 - (f) Which animals are least in number?
3. What is the possibility of getting a sunny day tomorrow?
 4. What is the possibility of a cat barking?
 5. What is the possibility of getting a certain color of candy from a bag?
 6. What is the possibility of a dog meowing?
 7. What is the possibility of a ball bouncing when dropped?

MATHEMATICS WORKBOOK

GRADE 2

Things to Bring

☐ Pencil

☐ Eraser

☐ Color Pencil

Pen case

☐ Textbook

☐ Notebook

☐ Slate

☐ Water bottle

☐ School Bag

About Mathematics Workbook

Mathematics workbook is designed for students to solve short exercises on daily basis for enhancing their basic mathematical skills. It is 15 minutes activity during morning assembly time. It is recommended to conduct these activities from the start of the academic year so that student can come to school regularly. The students work on one page per day. If the students finish 4 days exercise, they will take 1 assessment which cycle of this activity. Teachers are recommended to give homework to the students for every exercise. It is also recommended that teachers provide additional support students who struggle to understand the solution, ensuring that all learners can acquire basic math skills. **Scan the QR code for more information..**

How to use workbook

Ex: 1 Addition of two 1-digit numbers
Date: _____

Example Add the numbers and write in

$1 + 4 = 5$

Exercise Add the numbers and write in

① $2 + 4 =$

② $3 + 4 =$

③ $4 + 4 =$

④ $7 + 0 =$

Check ☐ / 4

Step 1.

Teacher need to write the example box on the board and explain how to think and solve the problem with student.

Step 2.

After the explanation, the teacher lets the students solve the exercise. The teacher instructs the students to solve it independently. The teacher needs to observe how they approach the exercise. If the students do not understand the question, the teacher provides individual support.

Step 3.

After almost all the students finish the exercise, the teacher needs to check the answer to the first question with the students. By reviewing the solution immediately, students can learn more effectively how to solve the problem.

Step 5.

The student needs to do homework and show the book to their family and obtain their sign.

Step 4.

The teacher marks the students' answers during the break time and writes the scores in the boxes and the summary

Ex: 1 Addition of two 1-digit numbers

Exercise Multiply.

①

	Ten	One
		4
X		4

②

	Ten	One
		5
X		3

Check ☐

/ 2

Ex: 32

Date _____

Example Write the answer in the box ✓

$$10 = 2 \times 5 = 5 \times 2$$

Exercise Write the answer in the box

① $15 = \square \times \square = \square \times \square$

② $12 = \square \times \square = \square \times \square$

Check ☐

Let's move on to
Assessment 8

/ 2

Assessment 8 <Ex.29-32>

Date _____

Multiply.

① $4 \times 7 = \square$ ② $10 \times 9 = \square$

③ $4 \times 6 = \square$ ④

	Ten	One
4		4
X		5

⑤ $6 = \square \times \square = \square \times \square$

Check ☐

Let's move on to
Ex. 33

/ 5

Ex: 33

Division without remainder within 100

Date _____

Example 4 girls share 12 balls equally.

$$12 \div 4 = 3$$

Exercise 4 girls share 8 balls equally.

$$\square \div \square = \square$$

Check ☐

/ 3

Ex: 34

Date _____

Example Write the answer in the box

$$12 \div 4 = \boxed{3}$$

$$4 \times \boxed{3} = 12$$

$$4 \times 1 = 4$$

$$4 \times 2 = 8$$

$$4 \times 3 = 12$$

Exercise Write the answer in the box

$$\textcircled{1} 8 \div 4 = \boxed{}$$

$$4 \times \boxed{} = 8$$

$$4 \times 1 = 4$$

$$4 \times 2 = 8$$

Check ☐

/ 1

Ex: 35

Date _____

Example Divide.

$$12 \div 4 = \boxed{} \rightarrow 12 \div 4 = \boxed{3}$$

Exercise Divide.

$$\textcircled{1} 20 \div 4 = \boxed{}$$

$$\textcircled{2} 10 \div 2 = \boxed{}$$

$$\textcircled{3} 9 \div 3 = \boxed{}$$

$$\textcircled{4} 16 \div 4 = \boxed{}$$

Check ☐

/ 4

Ex: 36

Date _____

Example Divide.

$$15 \div 5 = \boxed{3}$$

	Ten	One
5)	1	5
-	1	5
		0

$$15 \div 5 = \boxed{}$$

$$5 \times \boxed{3} = 15$$

Exercise Divide.

①

3)	1	2
-		

②

4)	1	6
-		

Check ☐

Let's move on to Assessment 9

/ 2

Assessment 9 <Ex.33-36>

Date _____

Multiply.

$$\textcircled{1} 4 \times 3 = 3 \times \boxed{}$$

$$\textcircled{2} \text{ Divide. } 20 \div 5 = \boxed{}$$

$$5 \times \boxed{} = 20$$

$$\textcircled{3} 25 \div 5 = \boxed{}$$

$$\textcircled{4} 12 \div 4 = \boxed{}$$

⑤

4)	1	6
-		

Check ☐

/ 5

Assessment Addition

Date _____

① $6 + 2 = \square$ ② $9 + 8 = \square$

③ $62 + 4 = \square$ ④ $\begin{array}{r} 78 \\ + 7 \\ \hline \end{array}$

⑤ $48 + 21 = \square$ ⑥ $\begin{array}{r} 57 \\ + 26 \\ \hline \end{array}$

Check ☐

$\frac{6}{6}$

Assessment Addition 2

Date _____

① $\begin{array}{r} 37 \\ + 8 \\ \hline \end{array}$

② $\begin{array}{r} 45 \\ + 7 \\ \hline \end{array}$

③ $\begin{array}{r} 48 \\ + 12 \\ \hline \end{array}$ $\begin{array}{l} 1+4+1 \\ 8+2 \end{array}$

④ $\begin{array}{r} 15 \\ + 45 \\ \hline \end{array}$ $\begin{array}{l} 1+4+1 \\ 5+5 \end{array}$

⑤ $\begin{array}{r} 59 \\ + 36 \\ \hline \end{array}$

⑦ $\begin{array}{r} 62 \\ + 29 \\ \hline \end{array}$

Check ☐

$\frac{6}{6}$

Assessment Subtraction

Date _____

① $4 - 2 = \square$ ② $14 - 8 = \square$

③ $87 - 6 = \square$ ④ $\begin{array}{r} 54 \\ - 9 \\ \hline \end{array}$

⑤ $\begin{array}{r} 86 \\ - 23 \\ \hline \end{array}$ ⑥ $71 - 17 = \square$

Check ☐

$\frac{6}{6}$

Assessment Subtraction 2

Date _____

① $80 - 20 = \square$ ② $\begin{array}{r} 66 \\ - 8 \\ \hline \end{array}$

③ $\begin{array}{r} 52 \\ - 9 \\ \hline \end{array}$

④ $\begin{array}{r} 81 \\ - 45 \\ \hline \end{array}$

⑤ $\begin{array}{r} 94 \\ - 85 \\ \hline \end{array}$

⑥ $51 - 44 = \square$

Check ☐

$\frac{6}{6}$

Assessment Multiplication

Date _____

Multiply.

① $4 \times 4 = \square$

② $5 \times 10 = \square$

③ $3 \times 9 = \square$

④ $18 = \square \times \square = \square \times \square$

⑤ 5×8

	5
X	8

5

Assessment Division

Date _____

Divide.

① $20 \div 4 = \square$

② $4 \times \square = 20$

③ $10 \div 2 = \square$

④ $25 \div 5 = \square$

⑤ $4 \overline{) 12}$

⑥ $4 \overline{) 16}$

6

Level Assessment

Date _____

Calculate.

$6 - 2 = \boxed{4}$ $6 \div 2 = \boxed{3}$

$6 \times 2 = \boxed{12}$ $6 + 2 = \boxed{8}$

Calculate.

① $6 \times 3 = \square$ ⑤ $8 \times 2 = \square$

② $6 - 3 = \square$ ⑥ $8 - 2 = \square$

③ $6 + 3 = \square$ ⑦ $8 + 2 = \square$

④ $6 \div 3 = \square$ ⑧ $8 \div 2 = \square$

⑨ $9 - 3 = \square$

⑩ $9 + 3 = \square$

⑪ $9 \div 3 = \square$

⑫ $9 \times 3 = \square$

12

Level Assessment 2

Date _____

① $\begin{array}{r} 89 \\ + 7 \\ \hline \end{array}$

② $\begin{array}{r} 47 \\ + 48 \\ \hline \end{array}$

③ $\begin{array}{r} 83 \\ - 5 \\ \hline \end{array}$

④ $\begin{array}{r} 76 \\ - 48 \\ \hline \end{array}$

⑤ $7 \times 7 = \square$

⑥ $8 \times 9 = \square$

⑦ $4 \overline{) 32}$

⑧ $7 \overline{) 63}$

8
